T.M. 05/09/07

IN THE CLAIMS:

Please enter the following claims:

1. (Currently Amended) A holder for a plurality of wallet-sized cards, comprising:
  - a case, including a top piece and a bottom piece connected by two sidewalls and a rear wall, defining an interior cavity with an opening along an end of said case;
  - a plurality of parallel slots disposed within the side walls of the case, said slots being adapted to accommodate the wallet-size cards;
  - a plurality of parallel cut-out sections in the top piece of the case; and
  - a plurality of ejection tab assemblies, each assembly being adapted for slidable movement toward said opening of the case and including a U-shaped member having an end adapted to engage and dispense at least two cards housed in said parallel slots in the direction of said opening, wherein a notch is disposed along said end of the U-shaped member, thereby forming two card engaging surfaces, and a button connected to said U-shaped member through one of said plurality of parallel cut-out sections.
2. (Original) The holder of claim 1, further comprising a resilient means for frictionally engaging the wallet-size cards within the case.
3. (Original) The holder of claim 2, wherein the means for frictionally engaging said cards comprises a resilient pad disposed on a side wall.
4. (Original) The holder of claim 2, wherein the means for frictionally engaging said cards comprises the plurality of parallel slots made from a resilient material.
5. (Cancelled).
